Shelby County Government

MARK H. LUTTRELL, JR.
MAYOR

February 20, 2014

TO ALL BIDDERS:

RE: **Addendum No. 1 to RFQ 14-002-39**
Walnut Grove Road Widening and Reconstruction Project

Please note the following revisions and clarifications to the above referenced project:

Question: The RFQ does not specifically mention geotechnical work. Is that something that the main design firms will include on their teams, or will it be handled by the county differently?

Answer: The prime consultants will be responsible for having the appropriate geotechnical expertise on their design teams.

Question: RFQ 14-002-39 requests relevant experience (case studies) for public and private sector projects (two from each sector). I would like to verify the need for the private sector experience (case studies) for these particular RFQs.

Answer: Please submit a minimum of four (4) public sector projects as opposed to two (2) public sector projects and two (2) private sector projects as originally stated in the RFQ.

Question: Does the intersection improvement at Houston Levee Road include redesigning the existing traffic signal?

Answer: This project will include redesigning/retiming the traffic signal at Houston Levee Road.

Question: Is geotechnical investigation to be included in this project?

Answer: See prior response.

The map of the project limits is available on the website.
